## SEPAKAT TRAINING CENTRE

Sepakat Training Centre (STC) is the training and education arm of SEPAKAT, a 100% Bumiputra-owned IT company, established in 1982. SEPAKAT's core business is the provision of computer products, services & training to the Government, private sectors & individuals.

Core competencies are based on Oracle, Hewlett-Packard (HP), Esri (GIS), Microsoft and services. The main business activities include the design, delivery, installation, development, commissioning, training, support & maintenance of computer systems, as well as, consultancy, research & development.

After about *twenty* years of operation, SEPAKAT has achieved an impressive track record of successfully winning and completing numerous projects & trainings, for numerous customers throughout Malaysia and the Asian region.

SEPAKAT is financially strong and has continued to grow solidly, even during the economic recessions of the mid-1980s and late-1990s. With long-serving and experienced employees, quite unique for an IT & Training company, SEPAKAT continues to aggressively operate in the very challenging IT industry.

SEPAKAT is registered with the MINISTRY OF FINANCE as a *CONSULTANT* in Information System and Computer.

As a full-fledged division of SEPAKAT, STC enjoys the strengths & resources available in SEPAKAT. Thus over the years, the major source of the training and education business, comes from portions of projects secured from existing SEPAKAT customers as well as general public & individual.

The serious venture into the IT training and education business is based on STC's firm commitment to contribute significantly towards Vision 2020, by producing more IT-literate workers and citizens.
